

THE NEW LIGHTWEIGHT 60 MODEL ALVEY SIDE CAST REEL IS IDEALLY SUITED TO A 11' - 12' GLASS OR CARBON COMPOSITE ROD.

TO ACHIEVE MAXIMUM CASTING DISTANCE THE REEL SHOULD BE MOUNTED APPROXIMATELY 6" UP FROM THE BUTT. THE FIRST RUNNER SHOULD BE APPROXIMATELY 1" DIAMETER AND PLACED 6'-6" FROM THE CENTRELINE OF THE REEL ON A 12' ROD (LIGHT-MEDIUM ACTION).

EVEN IF THE ROD IS A TWO PIECE AND ALL RUNNERS END UP ON THE TOP HALF, THIS DISTANCE SHOULD BE HELD.

OTHER RUNNERS SHOULD THEN BE PLACED TO SUIT THE ACTION OF THE TIP.

THE 60 IS DESIGNED WITH A SHALLOW LINE CAPACITY TO GIVE MAXIMUM RECOVERY AND ONLY USE 200-250m 6-9LB LINE.
